EXPLANATION.

Sheets of both the POLITICAL and LAYERED editions are printed in several colours,  
hill features being shown by contours and shading.

On sheets of the POLITICAL edition, colour ribands are added to emphasize the  
boundaries of administrative partitions.

On sheets of the LAYERED edition, altitudes are emphasized by graduated layers  
of different colours. (colour ribands along boundaries cannot be added on sheets of  
this edition).

# SURVEY OF INDIA

## MATTERS OF GENERAL INTEREST.

### HISTORY.

Prior to 1802, the date of the measurement of Lambton's Madras base line, when the Indian Government Survey began to assume a more scientific character, such Indian Topographical Surveys as existed were the result of reconnaissances, many of them merely route sketches undertaken to assist or illustrate military operations.

2. In 1821 the preparation of a quarter-inch map known as the *Atlas of India* was planned to cover the whole of the country in 177 sheets, each measuring 38 inches  $\times$  24·4 inches and the first sheet was engraved and published in England in 1827. The sheets were compiled and drawn in India and engraved in England until 1867, when the inconvenience of the arrangement led to their being engraved in India after that date. Shortly before this it had been found necessary to reduce the size of the sheet in order that publication might follow Survey within a reasonable period and since 1861, the *Atlas* has been prepared in sheets one quarter the size of those originally projected.

The price of the full size *Atlas* sheet is Rs. 2 and that of the quarter sheet As. 12.

3. From 1847 till 1883 the publication of the results of the various Topographical, Revenue and Cadastral Surveys on scales larger than one-inch to four miles followed no systematic plan. Detached surveys were executed and the resulting maps generally on the scale of one inch to the mile formed separate series, the sheets conforming not to projected limits of latitude and longitude but to those of areas of administration or survey. Thus in some cases the maps were published by districts, and in others (e.g.:—in the case of maps compiled from Revenue Surveys) by Main circuits, or

blocks of the traverse framework on which the survey was built up.

4. In 1883 the topographical maps of India on the one-inch and larger scales were standardised and numbering of old maps standardised. They were divided into sections of 30 minutes of longitude  $\times$  15 minutes of latitude, and each Province was given its own series of numbers.

The price of the old style one-inch maps is Rs. 1·8 or Rs. 2·8 if with hand or machine printed colouring.

5. In 1905 a systematic scheme for the publication of modern maps the maps of India in colours was accepted. The long deferred adoption of the true longitude of Madras, *viz.*, 18° 14' 51" east of Greenwich was decided on for all Indian maps, and this value is less than that used for the old maps by 2° 27' 18"; so that there is a gap of 2° 27' 18" between the eastern margin of a sheet published in the old style and the western margin of a modern sheet.

This is inconvenient but the correction to the longitude was essential and unavoidable if the Indian Surveys were to join up accurately with those of other countries.

### THE NUMBERING OF MODERN MAPS.

6. Under the 1905 scheme the whole of Southern Asia between meridians 44° and 124° east of Greenwich and between Parallels 4° and 40° north latitude is divided up into sheets of 4° latitude  $\times$  4° longitude on the scale of  $\frac{1}{1,00,000}$  called  $\frac{1}{1,00,000}$  or  $\frac{1}{M}$ , the sheets being numbered downwards in strips consecutively from the North West.

Each Indian  $\frac{1}{M}$  sheet is divided into 16 sheets of 1° of latitude  $\times$  1° of longitude, on the quarter-inch to one

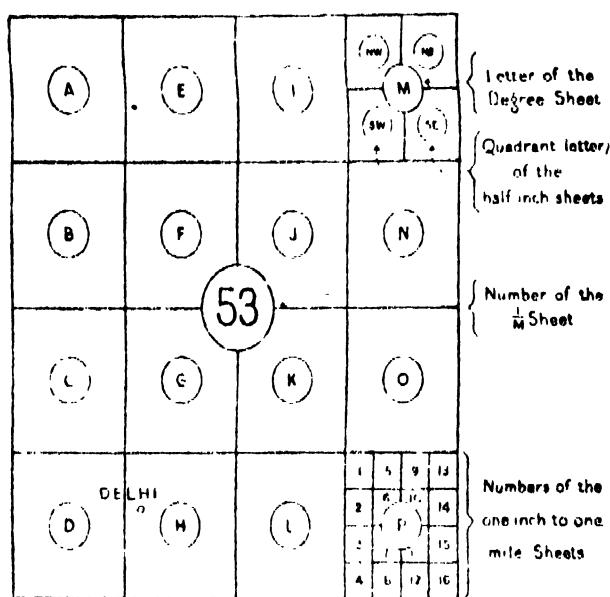

## CATALOGUE OF MAPS.

mile scale, known as Degree Sheets and lettered from A to P.

Each quarter-inch or Degree Sheet is in its turn subdivided into 4 half-inch to the mile sheets of 30' of latitude  $\times$  30' of longitude known as Half-Inch sheets and lettered N. W., N. E., S. W., S. E.

Each quarter-inch or Degree Sheet is also sub-divided into 16 one-inch to the mile sheets of 15' of latitude  $\times$  15' of longitude numbered from 1 to 16.

The following diagram explains the numbering:—

**Example—Thus :—**

- (1) the  $\frac{1}{1,000,000}$  sheet which includes Delhi is 53.
- (2) the Degree sheet which includes Delhi is 53 H.
- (3) the Half-inch sheet which includes Delhi is 53 H-N. W.
- (4) the One-inch sheet which includes Delhi is 53 H-2.

The modern maps on the above scales are of one uniform size, viz.,  $24 \times 19$  inches.

Fragmentary sheets including less than one-third of the area of the sheets are priced at half-price.

### TOPOGRAPHICAL MAPS.

7. The scale normally adopted for the publication of Indian Topographical maps from modern surveys is the scale of one-inch to the mile.

Scales of publication of modern maps.

Compilations are usually made from reductions of this scale to form the smaller scale maps of the half-inch to one mile series and quarter-inch to one mile or Degree Sheet series ; but in the less highly developed parts of the country the half-inch scale has been adopted as the scale of survey and publication and in some remote parts the quarter-inch scale.

8. The maps on the one-inch, half-inch and quarter-inch series from modern surveys are being published in colours, viz., black for outline and lettering, blue for water forms, red for roads and sites, yellow for cultivation, green with green ribands for wooded areas, brown for contours, cliffs, broken ground, sand, etc., and grey for hill shading. (On the quarter-inch scale there are certain exceptions to the above colouring, viz., the sites are in black instead of red, the yellow for cultivation is omitted and the green riband for wooded areas only is shown.)

The hills are represented by means of contours in brown at the following intervals :—

- 50 feet interval on the one-inch scale.
- 100 " " " half-inch scale.
- 500 " " " quarter-inch scale.

Shading is added to emphasize the more important ranges and spurs.

9. The above maps on the one-inch, half-inch and quarter-inch scale are published in a Editions of modern “Political” edition which is so called because the maps have the

Political (or administrative) boundaries printed on them in ribands of colour, though this was not done in the case of some of the earlier issues.

On the quarter-inch scale a “Layered” edition is also published on which altitudes are shown by graduated layers of colours but the administrative boundaries are omitted.

10. Pending the completion of modern topographical surveys certain maps on the one-inch, half-inch and quarter-inch scales are being brought out from old surveys or from new and old surveys compiled and arranged to conform in size to the maps from modern surveys.

These maps have been classified as “Preliminary” editions when published in colours ; and “Provisional Issues” when published in black or black and brown only.

The revised price of maps in the “Preliminary” edition is Rs. 1-8-0 each, and that of the “Provisional Issues” Re. 1 each.

Colour ribands to administrative partitions can be added by hand to the “Provisional Issues” at an extra charge of 8 annas per sheet.

Hand-colouring is not however recommended in the case of large or urgent demands.

### GEOGRAPHICAL MAPS.

11. The series of Survey of India sheets on the scale of India and adjacent countries series.  $\frac{1}{1,000,000}$  or approximately about 16 miles to one-inch is published in colours, viz., black for lettering blue for water forms, red for roads and sites. The hills are

## CATALOGUE OF MAPS.

shown by contours supplemented by hill shading. Two editions are published of each sheet completed from modern material, viz., (a) Political with colour ribands along boundaries to show the Political or administrative partitions and (b) Layered with graduated layers of colour to show altitudes. The revised price of each sheet is Rs. 1-8-0.

In cases where modern material is not available Provisional Issues are printed in black and brown only, price Re. 1 per copy.

12. In addition to the Survey of India series of maps on International series. the  $\frac{1}{1\text{ million}}$  scale, an International series of  $\frac{1}{1\text{ million}}$  sheets is being also undertaken by the Survey Department to meet the views of an International committee which assembled in London in November 1909 under the auspices of His Majesty's Government. This series is known as *La Carte Internationale du Monde* and the maps differ in size from the ordinary Survey of India  $\frac{1}{M}$  sheets as they include  $4^\circ \times 6^\circ$  of latitude and longitude instead of  $4^\circ \times 4^\circ$  and they also adopt the metre as the unit of height instead of the foot. The series is being produced as a special series in addition to, and after the production of, the corresponding sheets of the Indian series in conformity with the symbols, etc., of the International committee and to include items of interest to International geographers. Only one edition is printed in colours with contours and graduated layer tints to show altitudes. Price Re. 1-0-0 per sheet.

13. From the  $\frac{1}{1\text{ million}}$  sheets a series of maps is being compiled on the scale of Southern Asia series.  $\frac{1}{2,000,000}$  (or about 32 miles to one inch). These maps each comprise  $12^\circ$  of longitude and  $8^\circ$  of latitude and are published in both the Layered and Political editions. The series is called the Southern Asia Series and the price is Rs. 3-0-0 per sheet.

### GENERAL AND SPECIAL MAPS.

14. To meet various requirements a series of general maps of India have been compiled on scales ranging from 32 miles to 192 miles to the inch as follows:—

- (a) Scale 1" = 32 miles in 12 sheets measuring about 7 feet square in all.
- (b) Scale 1" = 64 miles in one or two sheets measuring about 3 feet square in all.
- (c) Scale 1" = 128 miles in one sheet measuring about 24 inches square.
- (d) Scale 1" = 160 miles in one sheet measuring about 18 inches square.
- (e) Scale 1" = 180 miles in one sheet measuring about 14 inches square.
- (f) Scale 1" = 192 miles in one sheet measuring about 12 inches square.

A series of special maps, of Provinces, of Districts, of Cities and Cantonments, of Miscellaneous maps and of Index charts are also published on various scales.

Particulars of the General and Special maps, etc., will be found detailed elsewhere in the Catalogue.

### FOREST MAPS.

15. All Forest maps are stored and sold by the Officer in Charge, Forest Map Office, Dehra Dun. These maps are published on the scales of 4 inches and 2 inches to the mile.

### THE SALE OF MAPS.

All maps published by the Survey of India are available for sale to the various Departments of Government and to the Public. Maps are not issued free.

### HOW PAYMENTS ARE MADE.

Supplies made to Government Departments are adjusted by book-transfer and no cash payment is required (*vide* para. 96, chapter 6, volume 1, of the Civil Account Code); but when the adjustment of the account by book-transfer is not feasible, a settlement of the account may be made in cash.

Supplies to the Public are ordinarily made V. P. P. but when mounted maps are ordered a remittance must accompany the order, and mounted maps once supplied cannot be received back into stock.

Cash payments may be made by Money Order, by Remittance Transfer Receipt or by uncrossed cheque. Cheques on banks outside Calcutta should have added to the amount the usual commission charges.

### POSTAGE AND PACKING CHARGES.

Postage and packing charges are to be borne by the purchaser. Maps are ordinarily sent by parcel post but may be sent in any other way convenient to the purchaser.

### MAP MOUNTING.

When any maps are required to be mounted the style of mounting required should be given. Experience has shown that the following styles meet all requirements:—

#### Styles of Map Mounting.

1. Mounting on cloth only.
2. Mounting on cloth and folding (without dissections), with stiffeners (limp covers).
3. Mounting on cloth and folding (with dissections), with stiffeners (limp covers).
4. Mounting on cloth and fitting on rollers as a wall map, varnished.
5. Mounting on cloth and fitting on rollers as a wall map, unvarnished.

**NOTE.**—Maps can be mounted either singly, or several sheets can be joined together and mounted in any of the above styles. Thus, maps on one scale covering a particular district or area can be made up as one map from a combination of sheets joined together and mounted on cloth.

Styles 2 and 3 can also be provided with stiff cardboard covers (cloth bound) for (a) Foolscap size Re. 1 extra and (b) smaller than Foolscap 8 As. extra.

### Charges for Map Mounting.

The charges for map mounting vary from time to time according to market fluctuations in the value of materials.

The *present* cost of mounting a modern map size  $21 \times 19$  inches or  $3\frac{1}{2}$  square feet in style 1, is 14 annas; style 2, 15 annas; style 3, Re. 1; style 4, Rs. 1-12; style 5, Rs. 1-10.

The cost of mounting an old map size  $40 \times 27$  inches or  $7\frac{1}{2}$  square feet in style 1 is Rs. 2; style 2, Rs. 2-2; style 3, Rs. 2-4; style 4, Rs. 3-8; style 5, Rs. 3-4.

Estimates for mounting any special map are furnished on application.

### HOW TO ORDER MAPS.

In ordering maps care should be taken to specify,

- (I) The number of the sheet and
- (II) Its scale.

No special order form is necessary except for Government officials whose attention is drawn to the form of Indent (No. O-57) on pages 6 & 7 of Catalogue.

In ordering maps by telegram a post copy of the telegram should always be sent in confirmation to obviate mistakes and consequent delays.

### AGENTS.

Maps may also be obtained from the following agents:—

### SUPPLY OF MAPS TO THE MILITARY.

INDIA ARMY ORDER BY HIS EXCELLENCY THE COMMANDER-IN-CHIEF.

No. 1029,

Dated 20th September 1921.

The following instructions regarding the provision of maps for training purposes are published for information and guidance.

These instructions will supersede those given in Training and Manoeuvre Regulations Indian Supplement, 1913, Section 23, Maps, which should be considered as cancelled.

- (1) General as well as topographical maps of India are obtainable from the Officer in Charge, Map Record and Issue Office, 13, Wood Street, Calcutta, on payment.
- (2) For training and manœuvre purposes maps on the scales of 1 : 1,000,000, quarter-inch, half-inch and one-inch to the mile only on Japanese paper with stiffeners and numbered or the outside cover, can be obtained at the special all round military rate of 12 annas a copy, provided a countersigned indent in form No. O-57 or O-57 (a) is submitted and one month's notice is given for large orders.

All other maps supplied will be charged for at full rates.

- (3) The policy that the  $\frac{1}{2}$ " scale map is suitable for war purposes having been accepted, the preparation of a series of maps on this scale has been taken in hand, and as these maps become available, they will be utilised for peace training.
- (4) For the normal training in field work of units quartered at defended posts, these half inch maps will be used when available; but for training of the garrisons in their duties in connection with the defence of their posts, the use of the larger scale maps up to the one-inch scale is allowed.
- (5) For certain selected areas special Artillery Practice maps on the three-inch to one mile scale have been prepared.

## CATALOGUE OF MAPS.

- (6) Maps on linen are no longer published and Japanese paper is now used for training and manœuvre purposes without a linen backing. When maps on this paper are not available, ordinary rag litho paper copies will be supplied in lieu. If, however, the latter are required mounted on linen the charges for mounting are extra for which estimates can be furnished.
- (7) The preparation and production of special maps will not be undertaken by the Surveyor General, except at the request of the Chief of the General Staff to whom all demands should be addressed. Such maps will not be supplied at the reduced rate and should only be asked for under very exceptional circumstances.
- (8) Catalogues and index sheets are obtainable from the Map Record and Issue Office and should be consulted to see if maps on particular scales are available before indents are sent in for maps.
- (9) Maps, mounted or unmounted, that are once supplied cannot be received back or exchanged for others by the Map Record and Issue Office, whether ordered in error or not.
- (10) All Indents for maps should be made in the indent form No. O-57 "ordinary maps" or O-57 (a) "For official use only" maps and not by telegram, except in cases of emergency when a copy of the telegram should invariably be sent by post in confirmation in lieu of an indent.

**NOTE.** All indents for Maps must show the Name of the Account Office to which the lay-out is rendered, for adjustment.

If this information is omitted, the indent will not be attended to.
